

To whom it may concern,
I was made aware of the NAB petition to stop satellite radio, such as XM, from broadcasting traffic and weather reports. I work in agriculture and drive approximately 50K miles per year. The weather reports are invaluable. I have purchased two XM systems for each of my vehicles. The variety and quality of music and information broadcasting can not be found on AM or FM.

I urge you to reject NAB's petition 04-160.

Thank you for your consideration .
